

CARECLEAN AIR FRESH

Waterbased liquid to eliminate unpleasant smells.

Careclean Air Fresh is a liquid based on perfumed oils in water. It is suitable for eliminating unpleasant smells in tanks.

Careclean Air Fresh is safe to use on most common metals and coatings.

Application

Careclean Air Fresh is often used if, after the cleaning of tanks a smell of the previous cargo (e.g. fish oil or terpentine) is perceptible after tankcleaning. It is recommended that the cause of the smell is determined before applying the product. If the smell is caused by bad cleaning, the tank should be re-cleaned because application of the product without tankcleaning may cause a surveyor to reject.

Directions for use

Careclean Air Fresh is sprayed in a 1:10 dilution with water. Normally, 1 to 2 liters of product is sufficient for one 400 m³ tank. Let the product evaporate for a reasonable period. It is also possible to dose 0.1 - 1% of the product to the last rinsing water after tankcleaning. Before entering the tank after treatment, it should be thoroughly ventilated.

Properties

Green colored liquid with a specific smell. Not corrosive to most common metals and coatings. Non-flammable, miscible with water.

Specific gravity	:	1.00
Flash point pm C.C.	:	None
pH (1% solution)	:	7.0
